

## Oil Supply Set Polished

Part # IW-100103  
(for Knovelhead)

### Warning !

Please, read these instructions carefully before the assembly!

The components of this kit are designed to be used together.

- 1.) This oil supply set comes with the pipeline connections with sleeve nut, cutting ring and thread part pre-assembled.
- 2.) Unscrew the pre-mounted thread parts and screw the Fine thread in the rocker box system-unit covers respectively at the engine block. Use teflon ribbon and screw sturdily. (Use 11 mm tool)
- 3.) Take the pipeline to position -- if necessary make little after-bendings or also shortens -- at this, with sleeve nut and cutting ring further the line blamed.
- 4.) Then holding the thread part with an 11 mm tool tight screw the sleeve nut with an 12 mm tool together on the thread part sturdily.
